Dictionary of the Economic Products of India, vi., pt. 2, p. 460. F10. 11. ever, so soft and silky, and possesses so much elasticity and strength, that it is well-fitted for numerous other uses. The fibre cells have a length of 1-5 to 3 mm. When more widely known and dealt with on an extensive scale, the Bowstring hemps are likely to prove most valuable. They flourish in rather damp situations, under the shade of trees, and extensive areas in West Africa and other countries could be devoted to the cultivation of these plants. When once established, they remain as a permanent crop, yielding regular cuttings of leaves two or three times a year. Somali-land Fibre *Sansevieria Ehrenbergii*.--This was first brought into notice in 1892, under the name of aloe fibre. The plant was determined at Kew as a species of *Sansevieria*, first collected by Dr. Schweinfurth between Athara and the Red Sea, and named by him *S. Ehrenbergii*. It is growing in large quantities in Somali-land, on the African coast opposite Aden. The leaves are solid, and almost circular, very stout and rigid, glaucous, and terminate in a strong, rather sharp point. Some are over 7 feet in height. The fibre received in this country was described by Messrs Ide and Christie as an excellent fibre of fair length, and with plenty of life. with the exception of its colour, its preparation is perfect, and even as it is we value it to-day (27...
