

Forest Bird Distribution, Density and Trends in the Ka u Region of Hawaii Island: Open-File Report 2007-1076

Filesize: 1.77 MB

Reviews

Comprehensive information for book fanatics. it had been writtern really completely and useful. I am happy to explain how this is the greatest publication i have read through in my very own life and can be he finest pdf for ever.

(Virginie Collier I)

FOREST BIRD DISTRIBUTION, DENSITY AND TRENDS IN THE KA U REGION OF HAWAII ISLAND: OPEN-FILE REPORT 2007-1076

Bibliogov, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.An accurate and current measure of population status and trend is necessary for conservation and management efforts. Scott and Kepler (1985) provided a comprehensive review of the status of native Hawaiian birds based on the extensive Hawaii Forest Bird Survey (HFBS) of the main islands (Scott et al. 1986). At that time, they documented declining populations and decreasing ranges for most species, and the extinction of several species over the previous 50 years. Many native bird species continue to decline throughout Hawaii (Camp et al. In review, Gorresen et al. In prep.). The focus of this study is the mid-to-high elevation rainforest on the southeast windward slopes of Mauna Loa Volcano (Figure 1). Known as Kau, the region encompasses forest lands protected by Kamehameha Schools, The Nature Conservancy, Hawaii Volcanoes National Park (HVNP), and the State of Hawaii i s Kau Forest Reserve, Kapapala Forest Reserve and Kapapala Cooperative Game Management Area, . Together these lands support one of three main concentrations of native forest birds on the Hawaii Island (the other two being centered on the Hakalau Forest National Wildlife Refuge and Kulani-Keauhou area in the north and central windward part of the island, respectively.) Because this region harbors important populations of native and endangered forest birds in some of the best remaining forest habitat on the island, it has been a focus of forest bird surveys since the 1970s. The Kau region was first quantitatively surveyed in 1976 by the Hawaii Forest Bird Survey (Scott et al. 1986). Surveys were conducted by State of Hawaii Division of Forestry and Wildlife in 1993 and 2002 and by the U.S. National Park Service and the U.S. Geological Survey...
