Reviews

A brand new e book with an all new point of view. I have got read and i am sure that i am going to likely to read through once more once more in the future. It is extremely difficult to leave it before concluding, once you begin to read the book.

WATER LOGGING CONTROL AND SANITATION

LAP Lambert Academic Publishing Jan 2015, 2015. Taschenbuch. Book Condition: Neu. 220x150x8 mm. Neuware - The tendency of dropping waste and garbage at Mwananyamala and Msimbazi rivers in Dar es Salaam causes overflow of water to Suna community at Magomeni Mapipa every year during the heavy rainfalls. These floods cause a lot of environmental problems including loss of lives, properties and poor sanitation which bring many diseases like malaria, typhoid and cholera. My research Objective is to identify Suna community needs and assess if the community is ready to participate and contribute for development activities in their locality, and provide opportunities to assess a situation and its resources and devise a means of getting project done. Procedure and methods include selection of respondent as representative as possible for the total population in order to produce a miniature cross-section. The selected respondents constitute what is technically called Sample and the selection process is called Sampling technique . The survey so conducted is known as Sample survey . 128 pp. Englisch.
