Rosen Classroom, United States, 2013. Paperback. Book Condition: New. 201 x 201 mm. Language: English . Brand New Book. Shapes are generally our first encounter with math. Geometry skills are learned from an early age, and readers build upon those first geometry lessons with topics like describing objects using the names of shapes, identifying both two-dimensional and three-dimensional shapes, and composing shapes. Readers are able to explore these essential concepts independently through easy-to-follow text and colorful images of both new and familiar shapes. Students learn to use the names of shapes to describe the relative position of an object in an accessible context. This book reflects standard K.G.A.1 of the Common Core State Standards for Mathematics.
